

the next ten or fifteen years with declining enrollments, with the necessity of reallocation of resources within those institutions and if the Legislature is going to be in the position to make policy judgments based upon facts and factual information, then this bill is exceedingly necessary.

PRESIDENT: Senator Dworak.

SENATOR DWORAK: Mr. President, colleagues, I have a question of Senator Warner if he will yield. I know the bill, Senator Warner, and first of all I want to preface my remarks by saying that I am in agreement with the concept of postsecondary coordination in the work of the Committee. My comment is specifically into the area calling for phase one through phase three to be completed in 1981. The Fiscal statement, I assume refers to only to phase one, the first year? I am in section four, subsection two, page four, where we are calling for two additional phases, phase two to be implemented next year, phase three in 1981 and possible Fiscal ramifications of those phases, Senator Warner.

SENATOR WARNER: What you find on the Fiscal Note is phase one and two, Senator Dworak. The cost that might be incurred in phase three and four obviously depend on the level of detail that might be suggested and I think that as was brought out many times during the discussion this last year by the Committee members, the one thing we are absolutely not interested in is the development of a bunch of reporting data just for the purposes of collecting paper and expensive information that is not pertinent for the policy making purposes of the Legislature and again as you can see, we have reduced even the cost down considerably that would be possible to be spent this year because I think we need, as I am suggesting, we need to move very slowly in order that we do not develop a bureaucracy that is not desirable.

SENATOR DWORAK: Thank you, Senator Warner.

PRESIDENT: Senator Maresh.

SENATOR MARESH: Mr. President, I have a question of Senator Warner. Senator Warner, how many Committee members will there be on this Advisory Committee? They are listed, then it says and such other representatives as may be necessary. It is sort of open-ended, isn't it? I count six members from the various organizations and then it says and such other representatives as may be necessary to carry out the work. Who is going to determine how many Committee members there shall be?

SENATOR WARNER: The legislative Performance, Review and Audit Committee which is the same Committee that has the responsibility for performance audits, which is the members of the Appropriation Committee, plus the Speaker, the Chairman of the Exec Board, the Chairman of the appropriate Committee as far as substantive information, in this case, education.

SENATOR MARESH: Is there any compensation for expenses for these Advisory Committee members?

SENATOR WARNER: No.

SENATOR MARESH: Thank you.
